JBin Project

# 01

## Company Overview

ABOUT JBin Project

# IT MARKET PROBLEMS

## Insufficient Information

Portfolio is the only option
For customers to verify
Developer's information

## Difficult Project Tracking

Customers can't figure out
whether development is going on
internaly or secondary order

## Lack of Dev Force

It is hard for customers to
acquire dev force in desired
service area

# Why JBin Project?

JBin Project has experts in various fields working on IT projects of various global companies. Currently, Covering the countries Asia. we started with Global experts, professors, and freelancers from large companies working in each field. Currently, we are expanding our business by securing developers in Asia, researching AI, and accumulating project experiences of various global companies. The ultimate goal is to build an environment where engineers can demonstrate their outstanding capabilities in the IT outsourcing market. At least two representatives participate in the project and perform most of the services together with the engineers
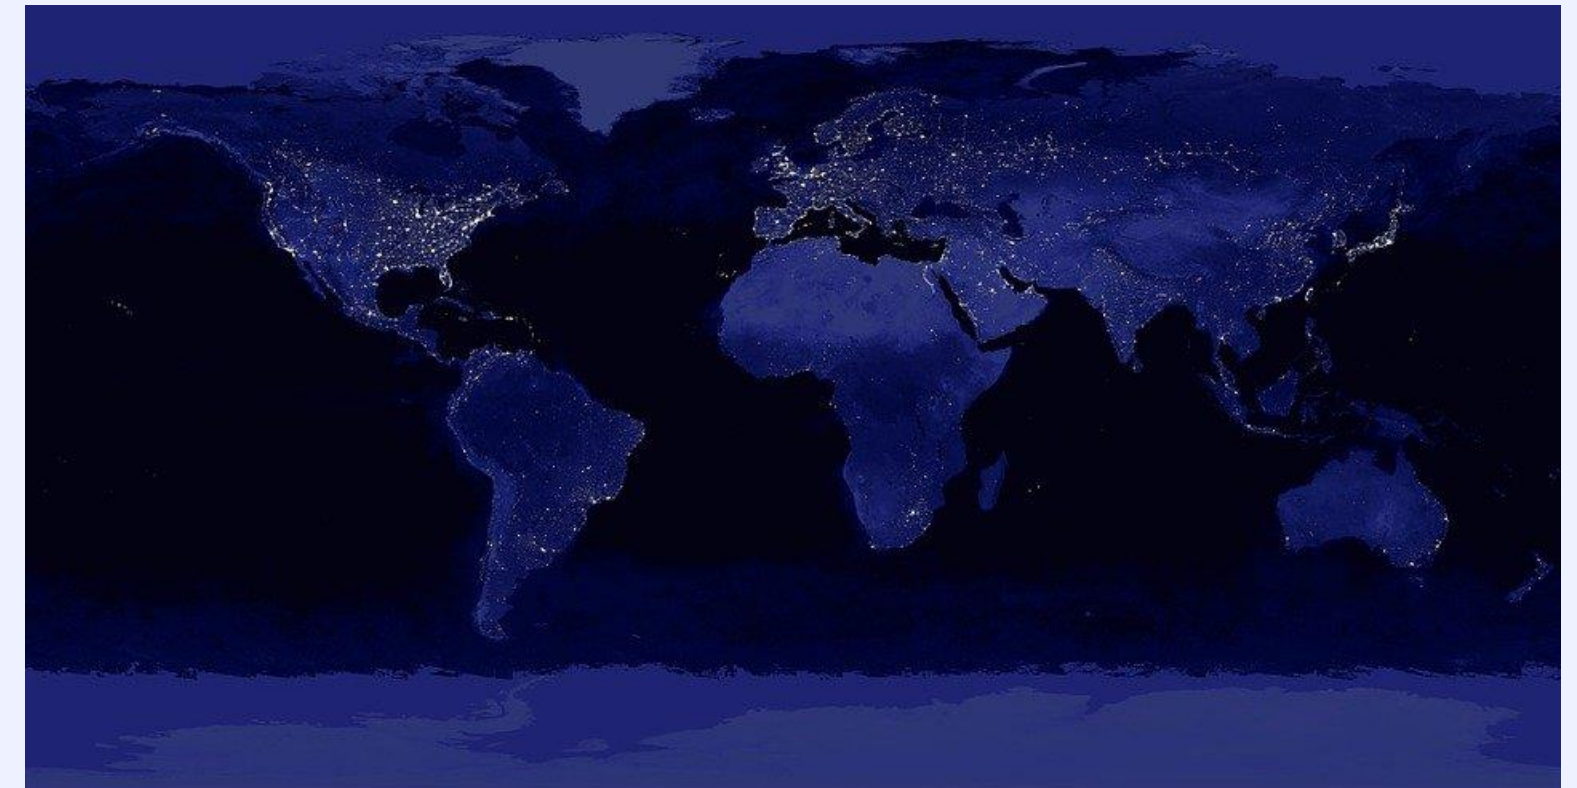

# How we do the Project

We maintain partnership with global companies from many countries, including South Korea, the Philippines, Vietnam, the United States, Canada, and Europe, and regularly updates our data based on the project output.

# 글로벌 프로젝트 사례

GLOBAL OUTSOURCING

# 프로젝트 사례

A face and object recognition system using AI, Computer Vision, Machine Learning and Deep Learning technologies. Thanks to powerful technologies, Eyescom could identify faces; detect and classify multiple objects including the location of each object within the image.

-TECHNOLOGY
 Computer vision, Machine Learning, Deep Learning, etc.

# 프로젝트 사례

MBBank (the State Bank of Military Commercial Joint Stock Bank) is one of the largest banks in Vietnam and is an agency unit under Ministry of Defense of Vietnam. TTC Solutions provided the back-end and application development for eMB.
It is also a core banking system, specialized for MBBank's enterprise clients.

-TECHNOLOGY
Java, Spring Boot , Dropwizard, React native, Angular, Oracle , CI/CD: Jenkins, gitlab .
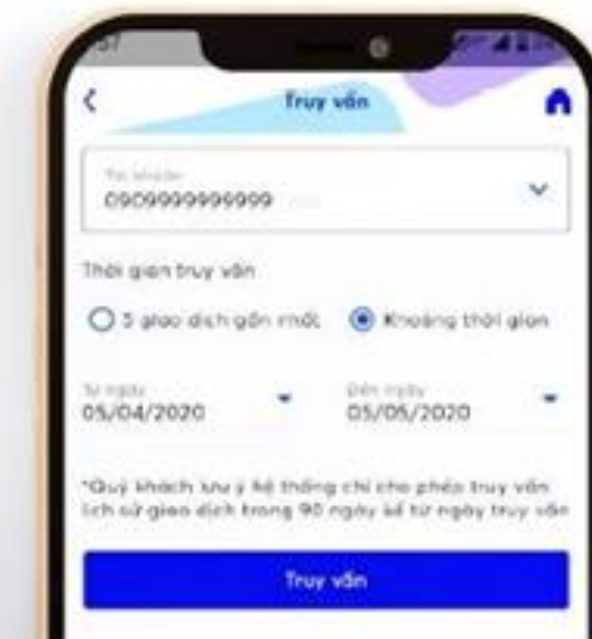

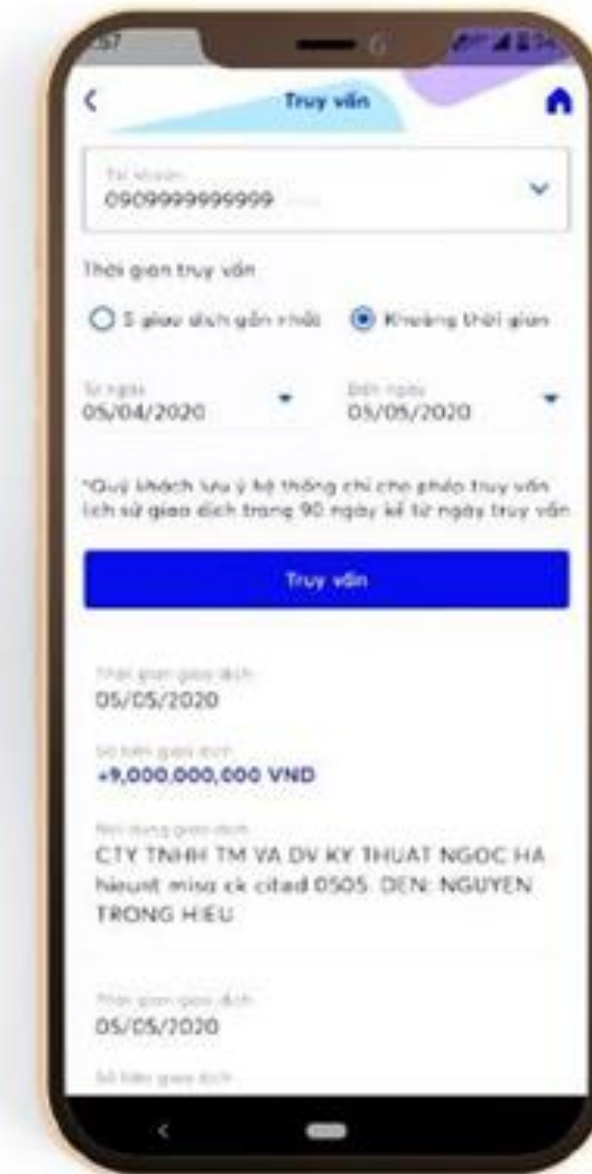

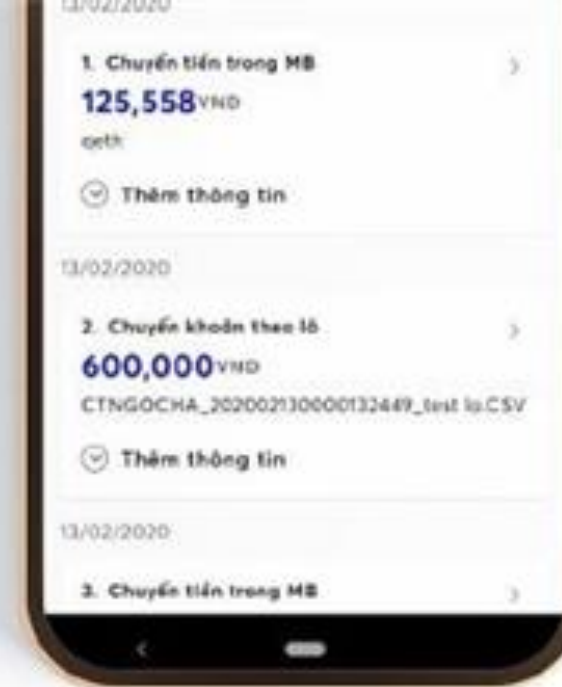

# 프로젝트 사례

The client is one of the giant financial corporates in
Japan.
It allows users in Japan who have the wallet account
and have earned Rewarding Points to convert their
loyalty points to crypto assets available on the wallet:
Bitcoin (BTC), Ethereum (ETH), and Bitcoin Cash (BCH)

-TECHNOLOGY
Ethereum,Bitcoin,Bitcoin Cash, Spring, MyBatis, MySQL, Redis,
Jgroup, Netty, ZMQEtcd, Blockchain, Nodejs .

# 프로젝트 사례
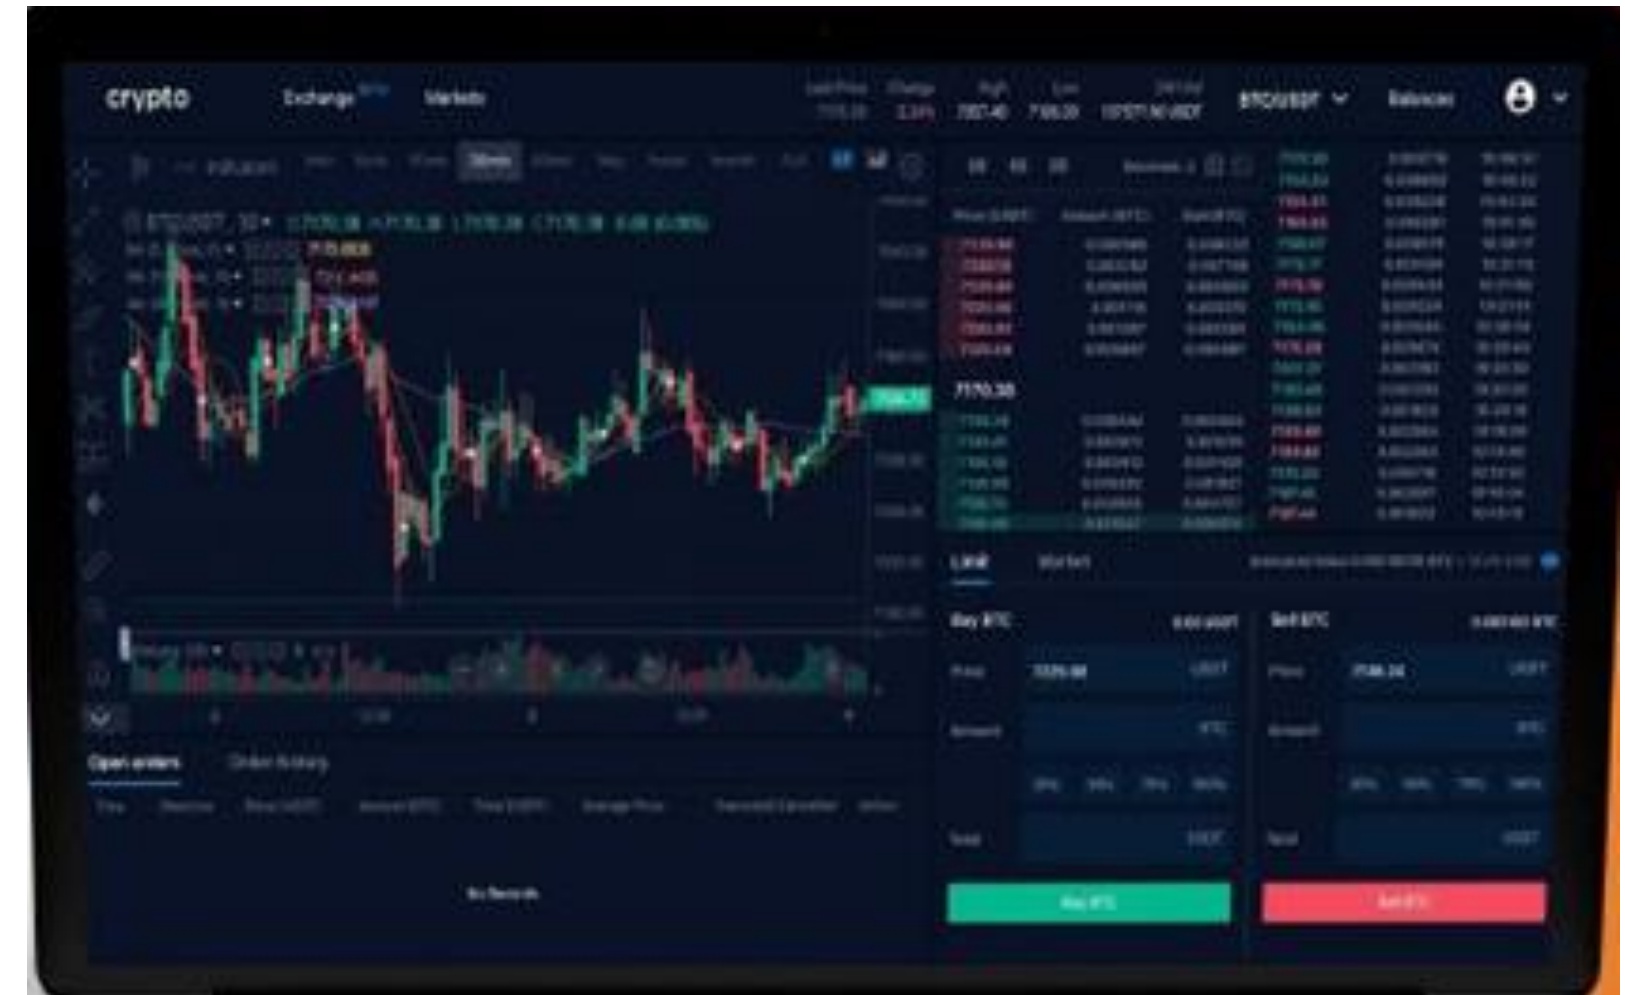

The client is one of the giant financial corporates In Japan.
It is a Digital Asset management solution manages the entire lifecycle of blockchain based digital assets, including origination, issuance, exchange, clearing and settlementor margin trading.

-TECHNOLOGY
 Spring , JPA , MyBatis, MS, MySQL, MemCache, Redis, Jgroup,EmberJS, Netty, ZMQ, Etcd, Saleforce

# 프로젝트 사례

Traffic Sign Recognition
Applying Ai to Recognize the traffic signs and locate the traffic sign position on the map

-TECHNOLOGY
Faster RCNN, YOLO, Center net, EffcientDet, TensorFlow, TensorRT, Pytorch
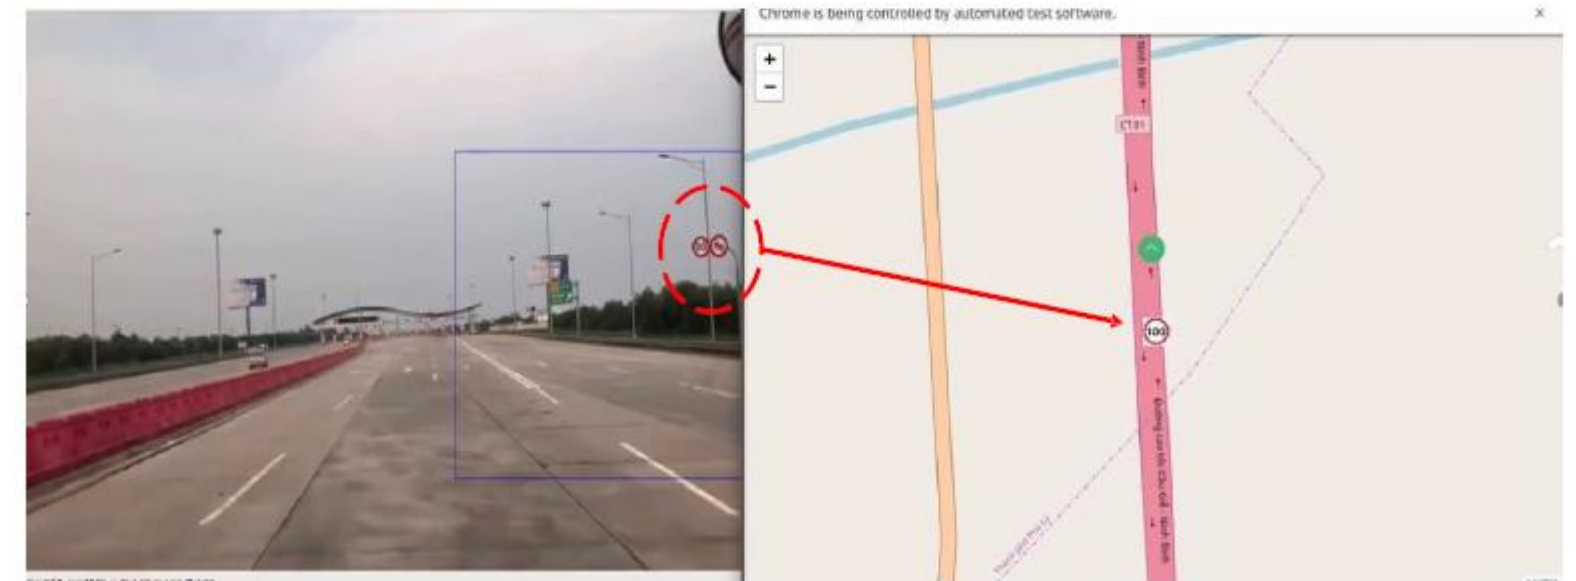

# 프로젝트 사례

Invoice Recognition

Solution for a client Detect and recognize the stamp on the
scanned invoice to distribute to the corresponding company
invoice set.
•Result
Accuracy:93%
Processing speed:3.7s/invoiceon GPU, 8s/invoiceonCPU

-TECHNOLOGY
Faster RCNN, YOLO, Center net, EffcientDet, TensorFlow,
TensorRT, Pytorch

# 프로젝트 사례

DoctorBooking MVP
This is startup in healthcare, they want to build a doctor booking
application, connecting patients, doctors and clinics.
+ Web application
+ Mobile application

-TECHNOLOGY
Flutter, Node.js, MongoDB

| Patient | Doctor & Clinic | Admin |
|---|---|---|
| • Register and Sign In | • Register and Sign In using mobile phone numbers, Facebook accounts or Google Accounts. | • Sign In |
| • Search for nearby doctors/clinics and medical categories. | | • Data Appropriation |
| | | • Create/Manage Users (Patients, Doctors, Clinics) |
| • Filter search results by distance, number of reviews, etc. | • Complete Profile | • Calendar |
| | • Create Calendar and Share Timeslot | • Notification |
| • Select doctors and clinics. | • Approve Appointment | • Manage Payment |
| • Book an Appointment with schedule. | • Payment Management | • Manage System |
| • Receive Notification | • Manage Appointments | |
| • Select Payment Method | • Manage Reviews | |
| • Give Feedback | | |
| • Manage appointments | | |
| • Edit profile | | |

☐ 추진 주체별 역할

| 구 분 | 주 요 역 할 |
|---|---|
| PM | o 모의해킹 및 취약점 진단 업무 총괄<br>o 사업관리 및 진단 업무 관련 행정처리<br>o 구성원 별 역할 부여 및 소통 관리 |
| Global Team | o 각 보안전문가의 전문 분야 별 모의 해킹 지원<br>o 외부 서비스 침입 시나리오 구축 |
| Korea Team | o 환경 조사 (내부 권한 제공시)<br>o 정보 수집<br>o 모의해킹 및 취약점 진단 수행<br>o 이행 점검<br>o 결과 분석 및 보고서 작성 |
| Backup | o 각 팀별 인원 충원 필요시 용역 제공 |

## 구성원 경력

- 각종 국제, 국내 해킹대회 입상 경험 혹은 일정 수준 이상의 활동 경험
- 각종 CVE 숙지 및 POC코드 작성 경험
- 해킹 관련 활동 2년 이상
- 실제 서비스 버그 바운티 활동 경험
- 조사 서비스에 대한 이해 및 관련 기술 보유

## 3 추진일정

| 구 분 | W | W+1 | W+2 | W+3 | W+4 | W+5 |
|---|---|---|---|---|---|---|
| 추진계획 협의 및 착수보고 | ■ | | | | | |
| 환경 세팅 | ■ | | | | | |
| 정보 수집 | | ■ | | | | |
| 모의해킹 및 취약점 진단 수행 | | | ■ | ■ | | |
| 이행 점검 | | | | | ■ | |
| 결과분석 및 결과보고 | | | | | | ■ |
| 최종 검수 및 완료 | | | | | | ■ |

## Ⅲ. 과업내용

### 1 과업 요청 개요

☐ 요구사항 총괄표

| 구 분 | 설명 | 요구사항개수 |
|---|---|---|
| 컨설팅 요구사항<br>(CNR: ConSulting Requirement) | CNR-OOO-OOO-OO | |
| 보안 요구사항<br>(SER: Security Requirement) | SER-OOO-OOO-OO | |
| 제약 요구사항<br>(COR: COnstraint Requirement) | COR-OOO-OOO-OO | |
| 프로젝트 관리 요구사항<br>(PMR:Project Management Requirement) | PMR-OOO-OOO-OO | |
| 프로젝트 지원 요구사항<br>(PSR:Project Support Requirement) | PSR-OOO-OOO-OO | |
| 합 계 | | 협의 후 확정 |

※ 본 사업에서 협의한 내용을 원칙적으로 준수해야 하고, 사업 내용이 변경될 경
우 과업변경절차에 따라 상호 협의하여 결정

# 프로젝트 사례

Confidential / 고객의 요청으로 인한 비밀 유지

-Details
Malware Testing for Network Device
Check network equipment malware (Cisco model)
AZURE Environment Server Vulnerability Verification and
Patch (Cloud) CVE-2021 Exploit

# 프로젝트 사례

Syngenta Korea Support for IT development and Infrastructure

-Details
AD  Administration
Onsite IT Support
Onsite IT Education
Server & Network on premise support
OEE Web  Development
KT Cloud Administration support
Security

# 프로젝트 사례

Global Data center support for Donaldson

-Details
SERVER DEVICE ISSUE TROUBLE SHOOTING
Support for resolving server equipment issues.
Technical consulting support for problem diagnosis and resolution.

# 프로젝트 사례

IT Administration / 고객의 요청으로 인한 일부 사항 기밀

Onsite IT support for administration
Manage Local Server hardware & solution
Support AD administration
Support Infrastructure maintenance
IT Consulting
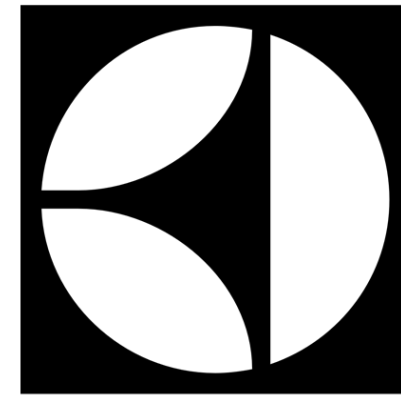

# 프로젝트 사례

## Our Projects

Confidential / 고객의 요청으로 인한 일부 사항 기밀

-Details

Onsite IT support for administration
Design and Deployment of AP network of Gwanghwamun
global customers SD-wan Migration Project
Support overall network design and equipment deployment

Site Survey Support
 3WAP, 2ISR installation support and setup 9130 Wireless AP
controller installation support

# 프로젝트 사례

Confidential / 고객의 요청으로 인한 일부 사항 기밀

-Details
Support in the event of a global pharmaceutical company failure in laboratory and office networks and servers.

Support for all 10 cities in South Korea and engineers 24 hours a day.

APAC Surgical Television Live Broadcast Transmission. Equipment installation and network installation support.

# 03

## 서비스 모델

Service model

# Hacking & Security

해 킹 과 보 안

Excellent talents who have won world hacking competitions or have worked for Global companies will provide you the best service.

Establishing a detailed plan for performing security consulting.

Penetration Testing,

Provide the latest vulnerability reports according to the enterprise infrastructure environment.

Bug Bounty Service

# Infrastructure

인 프 라

Including the latest cloud technologies,
We support design, development, deployment.

On Premise support possible

AWS, AZURE, GOOGLE CLOUD support available

Engineers who have experience in various global
infrastructures more than 20 Years

# Development and Consulting

개 발 및 컨 설 팅

From early start-ups to large companies, we provide service
customer needs. Currently, Jbin Project has a pool of more
than 300 global developers by establishing our own
development network. Through data-based services,
we are not only developing by  our team
but also trying to  provide consulting services for
better projects to the customers to remove the risk
